Yes - I think Erin can assess the usefulness of these meetings and suggest our level of participation, and by whom.

I think this is the same forum that was pointed out in last week's snippy exchange on the effects analysis.

And someone should coordinate with laura fujii on all of this. I had thought she was going to have more time to invest in Delta issues.

Okay, I will attend -- and 10-4 on caution with best use of time.

Sure, if you would find it useful. I'd be interested in your feedback after the meeting. Expect there to be pressure to attend regularly which, unless its really productive, we need to resist.

Would you be okay with me attending this meeting? Probably not something to attend regularly but I feel like it would help me become more familiar with all of the things DWR is seeking to get coverage for under ESA and potentially CWA.

This is the DWR run process or reviewing the EIS/EIR. This isn't the P&N meeting. Probably a good idea for you to get on mailing list and attend if able
